COMPLETION OF 1953 FALL PLOWING, SOWING IN RUMANIA

[Comment: The following report was compiled from October, November, and December 1953 issues of the Bucharest daily newspapers Viata Capitalei, Romania Libera, Scanteia, and Munca. The report contains final figures on fall plowing and sowing in all 18 regiunes of the country. The table gives a breakdown, by regiunes, of harvest completion per hectare or by percentage.

The figures tend to show that about 50-60 percent of the country completed agricultural preparations for fall. Severe criticism was voiced in the press of negligence and lack of interest by executive committees of regiune, raion, and commune people's councils in some regiunes, and even by some state farms. The weather was reported fair during part of October and November, with some rainfall, which conditioned the soil for plowing and sowing.

Numbers in parentheses refer to appended sources.]

GENERAL

State farms all over the country completed 76 percent of fall plowing and 44 percent of sowing by 10 October 1953. Some state farms completed 100 percent of fall sowing. The following completed fall sowing ahead of schedule: Costache Burca State Farm, Constanta Regiune; Cacomeanca State Farm, Bucharest Regiune; Parincea and Racaciuni state farms, Bacau Regiune; Siria State Farm, Arad Regiune; Salonta State Farm, Oradea Regiune; and Laslea, Seleus, Sighisoara, and Axente-Sever state farms, Stalin Regiune. Fall sowing was almost fully completed at Cocargeaua State Farm, Constanta Regiune; Deparati State Farm, Bucharest Regiune; Halaucesti and Moara Grecilor state farms, Iasi Regiune; Sercaia State Farm, Stalin Regiune; Bilciuresti State Farm, Ploesti Regiune; Segarcea State Farm, Craiova Regiune; and Ratesti State Farm, Pitesti Regiune.

50X1-HUM

There are some state farms, however, in which work is lagging, in spite of favorable climatic conditions and sufficient manpower and machines. The following completed only a small part of their plans: Susenii State Farm, Barlad Regiune; Todiresti State Farm, Iasi Regiune; Burila-Mare, Rogova, and Brancoveni state farms, Craiova Regiune; Jeamul-Mare State Farm, Timisoara Regiune; Manastur State Farm, Arad Regiune; and Somcuta State Farm, Baia-Mare Regiune.

Romanu State Farm, Galati Regiune, had the same working facilities as the Urleasca State Farm, which completed 80 percent of fall sowing. However, Romanu State Farm sowed only 17 percent of planned areas due to the negligence and inefficiency of its management. The same conditions existed at Ramnic State Farm, Constanta Regiune. This farm completed 80 percent of plowing, but only 20 percent of planned sowing by mid-October. The managements of lagging state farms should take immediate steps to improve the situation.(1)

More than 30 state farms in Rumania have completed sowing [by 25 October 1953]: These include Cocargeaua, Fetesti, Lenurile, and Pietroiu state farms, Constanta Regiune; Ratesti State Farm, Pitesti Regiune; Urleasca State Farm, Galati Regiune; Carei State Farm, Baia-Mare Regiune; Bilciuresti and Ceptura state farms, Ploesti Regiune; Popricani State Farm, Iasi Regiune; Lechinta State Farm, Cluj Regiune; Deta State Farm, Timisoara Regiune; and Deparati-Harlesti State Farm, Bucharest Regiune. State farms in Oradea Regiune mobilized their full manpower and completed sowing by 17 October 1953. All state farms of the country have completed 43,064 hectares, or 63 percent, of fall sowing [by 25 October].

The managements of some state farms, however, neglected to take prompt action. These included Afumati, Bacles-Dobra, Vartopu, and Motatei state farms, Craiova Regiune; and Sarinasuf State Farm, Galati Regiune.(2)

MTS in Arad, Cluj, Stalin, and Timisoara regiunes and the Hungarian Autonomous Regiune led in the fall campaign for the whole country. On the other hand, agricultural fall work in Pitesti, Ploesti, Bacau, and Iasi regiunes dropped considerably below schedule. The inefficiency in some regiunes was the more reprehensible as rainfalls in the second half of October conditioned the soil for plowing.(3)

MTS operators throughout Rumania plowed and sowed 251,212 hectares more in the fall of 1953 than in the same season of 1952. Arad and Timisoara regiunes had the best results. Tractor operators and mechanics at Peciul-Nou MTS, Timisoara Regiune, completed their plan 110 percent. Felneac MTS, Arad Regiune, completed its plan by 107 percent. MTS in the following regiunes completed 100 percent of their plans: MTS in Carei Raion, Baia-Mare Regiune; Cobadin Raion, Constanta Regiune; Bailesti Raion, Craiova Regiune and Roman Raion, Iasi Regiune. There are, however, some MTS that remained behind schedule due to the lack of organization and efficiency, such as Mihailesti MTS, Ploesti Regiune; Vlaici MTS, Pitesti Regiune; and Mirosi MTS, Bucharest Regiune.(4)

All of Rumania completed 70.5 percent of fall sowing by 25 October 1953. Baia-Mare Regiune completed the entire plan. Results were good wherever executive committees of people's councils understood the importance of urging peasants to take advantage of every good workday, and where technicians were constantly among the peasants in the fields. Bucharest, Craiova, Pitesti, and Oradea were among the leading regiunes, with 80 percent of fall sowing completed. However, some regiunes were behind schedule because they did not get the proper support from executive committees and agricultural agents. Among these regiunes were Arad, Bacau, Galati, and Timisoara.

50X1-HUM

Baia-Mare, Craiova, Pitesti, and Oradea regiunes and the Hungarian Autonomous Regiune completed the largest areas of deep fall plowing.

Executive committees of regiune people's councils, tractor and machine operators at MTS, and agricultural agents were urged to complete the fall campaign at an early date.(5)

The weather was favorable over most of Rumania in November. Fall plowing and sowing and plowing for spring sowing proceeded, therefore, according to rules. In many regiunes, such as Baia-Mare, Bucharest, Craiova, Pitesti, and Oradea, large areas were plowed for fall sowing. In Segarcea Raion, Craiova Regiune, the plowing plan was completed 113 percent. Fall work was almost completed by the end of November in Amaradia and Slatina raions, Pitesti Regiune; and Satu-Mare Raion, Stalin Regiune.(6)

FALL PLOWING AND SOWING

The following table shows the amount of fall plowing and sowing completed by each regiune.
